

Solution add-on

Maximise the efficiency of your rental business

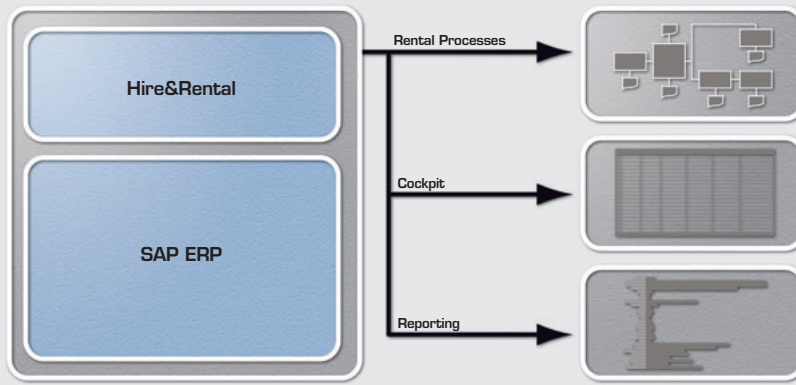

HIRES&RENTAL SOLUTION ADD-ON

Equipment hire is a service provided by dealers and manufacturers that is becoming increasingly important in the value-added chain of these businesses.

Tools and technical equipment of all types are hired out in addition to the usual rental items such as construction machinery, containers and transportation equipment.

Conventional traders, in particular, have identified rental as a new business opportunity and are providing this additional service for industrial business partners, tradesmen and consumers. What has been missing until now was a solution based on SAP that enables companies with rental business to manage and control their rental processes more efficiently. itelligence is closing this gap.

itelligence

A comprehensive and efficient rental solution

With SAP software and the business add-on Hire&Rental from itelligence, you receive a pre-configured system that provides total flexibility and a high level of integration. The Hire&Rental solution add-on supplements your SAP solution with the full range of rental processes from the offer through to periodic settlement.

It ensures fast, simple monitoring and management of rental processes via the rental cockpit and provides views of capacity utilisation, the rent index and availability.

The central control element is the rental order management view. The rental items available by region and time can be searched and selected with this view. Using a graphic calendar display, the system enables a fast assessment of availability and optimises the selection of rental items. Settlement-related data is selected and stored in this view, in addition to the rental item.

This rental view can be used for serially or non-serially managed goods, for short-term or long-term rentals and also for collective rental items. For ongoing processes, this view enables the checking of progress and the updating of rental activity data.

Harness the power of SAP

With SAP software and the business add-on Hire&Rental from itelligence, you receive a preconfigured system that provides total flexibility and a high level of integration. The Hire&Rental solution add-on supplements

your SAP solution with the full range of rental processes from the offer through to periodic settlement.

With the Hire&Rental solution add-on, we provide traders and hire firms with an industry solution that is already integrated into the complete process environment of an SAP solution.

Based on the industry solution it.trade, with its preconfigured processes for sales, warehousing and purchasing, this solution complements existing functions to map day-to-day hire operations as efficiently and smoothly as possible. In this way, all business areas from logistics through to accounting, from hire through to maintenance and repair and from time management through to payroll accounting, are fully and seamlessly integrated.

Even if approximately 80 % of the processes in retail and hire are similar and follow the same principles, it is the remaining 20 % that determine the overall efficiency of the system because of their inherent uniqueness.

Hire&Rental offers the following functions:

- Management of rental contracts
- Hiring transactions as an item in order entry
- A wide variety of settlement types (daily, weekly and monthly)
- Own and third party rental (mileage rental)
- Operation via a "rental cockpit"
- Overview of the rent index
- Evaluation of rental use
- Maintenance and repair
