

### **EDI solution from itelligence receives the “Powered by SAP NetWeaver” seal of quality it.x-change EDIFACT successfully certified for SAP NetWeaver**

Bielefeld, Germany, March 9, 2006: Today, itelligence will announce the “Powered by SAP NetWeaver®” certification of its “it.x-change EDIFACT” EDI solution components, applicable worldwide. it.x-change was developed completely on the basis of the SAP NetWeaver Exchange Infrastructure (SAP NetWeaver XI). Through the it.x-change, companies can electronically exchange standardized messages based on the EDIFACT standard and built directly upon the SAP NetWeaver platform. With this certification, SAP validates that the new EDI solution from itelligence provides informative documentation and technically flawless integration into the SAP NetWeaver environment as XI content, with access via the SAP Enterprise Portal.

Markus Kellermeyer, Technology Consulting Manager at itelligence, comments: “We are pleased about the rapid certification and tremendous acceptance by our customers. The “Powered by SAP NetWeaver” certification shows: it.x-change EDIFACT not only fulfills all of SAP’s technical demands for integrating XI content, it also fulfills the expectations of our customers.”

This itelligence EDI solution has already been implemented by a number of customers, including KTR Kupplungstechnik GmbH in Rheine, Germany. Particularly the emphasis on the integrability of it.x-change is important for KTR. Stephan Rosenberger, IT Manager at KTR, says: “SAP NetWeaver XI, in combination with the EDI solution it.x-change from itelligence, is for KTR the ideal solution for integrating our customers into our SAP systems landscape. Thus, it provides us with a perfect foundation for the successful process-oriented teamwork with our business partners.”

The central installation based on standard SAP technology, the high data throughput – thanks to the implementation of performance enhancing routines in Advanced Business Application Programming (ABAP) and the easy possibility for customers to perform communication partner profile modifications and message types themselves have proven to be great advantages of it.x-change EDIFACT. Besides, no additional third-party products such as EDI subsystems or further server systems are necessary.

it.x-change EDIFACT successfully certified for SAP NetWeaver**

As a supplement to its it.-x-change EDIFACT components, itelligence also covers message processing based on the VDA standards commonly used in the automotive industry. As an alternative to proprietary operation, itelligence also offers its customers the usage of an ASP solution in a data center operated by itelligence.
