

itelligence signs up Krone Group as a new SAP customer

itelligence confirms its expertise in the commercial vehicle industry

Bielefeld, June 15, 2004 - The SAP consultancy, itelligence AG, will introduce mySAP ERP at Bernard Krone Holding GmbH & Co. KG. In 2003 the Krone Group generated a total turnover of more than EUR 600 million and is Europe's second largest manufacturer of truck trailers and semi-trailers. One third of turnover is generated by the division of agricultural machinery, with innovative products in the range of modern hay and forage harvesting technology. The Group currently employs 1,500 people in Europe.

The extensive consulting and implementation project was launched in Germany in May 2004 and involves all sectors of business under Bernard Krone Holding GmbH & Co. KG including Maschinenfabrik Bernard Krone GmbH (Spelle), Fahrzeugwerk Krone GmbH (Werlte) as well as Landtechnik Vertrieb & Dienstleistungen Bernard Krone GmbH (Spelle).

At Krone, itelligence will replace a very heterogeneous server software system and implement SAP throughout the Group. In addition to the basic SAP system, itelligence will install the sales, logistics, accounting and controlling modules as well as the modules for product development, production and quality management including the after-sales modules. Roll-out of mySAP ERP at the German Krone plants in Spelle and Werlte is planned for 2006.

By implementing the SAP solution, the Krone Group wants to address the issue of constantly growing data volumes and ever increasing complexity and create a solid foundation for the future which will enable it to meet internal and external requirements. SAP will increase Krone's competitiveness and support its continued strong growth. As a basis for this, the project will ensure end-to-end support of management processes and uniform reporting and controlling.

Krone Group's decision to operate the new SAP system on three high-performance HP Itanium servers at itelligence's computer centre in Bautzen will ensure speedy completion of the first project phase. The SAP Solution Manager will be used to automate the introduction which will not only shorten the implementation phase noticeably but also permit better monitoring of the systems.

itelligence AG - press release

itelligence signs up Krone GmbH as a new SAP customer

itelligence confirms its automotive industry expertise

Dr. Goy Hinrich Korn, Head of Organisation/IT of Krone Group: "The introduction of mySAP ERP will be strategically one of the most important projects for the Krone Group for the next 10 years. With SAP we are focused on a standard working system, that runs cost effective. That is the reason why we will be up-to-date, technically and functionally, with our enterprise software and we are able to optimises our processes."

Dr. Birgit Bohnhorst, Director Business Unit SAP Germany and Austria: "This contract for the implementation of mySAP ERP at Krone clearly underlines itelligence AG's expertise in the commercial vehicle and automotive industry."
