

**SAP consulting house itelligence wins new customers in the industrial and medical sectors**

**Ondal Industrietechnik expands its own competence in human resources together with itelligence and SAP HR**

Bielefeld (Germany) October 23, 2007 – Ondal Industrietechnik GmbH, headquartered in Hünfeld, Hesse, Germany, has chosen the SAP consulting house itelligence as its new SAP and outsourcing partner in the area of human resources. Since September 2007, itelligence has been hosting general HR functions and has taken over output management of the HR division, including printing and sending of pay statements for Human Resources, directly from the SAP system.

Ondal Industrietechnik, with subsidiaries in China and the USA, develops and manufactures pendant systems for medical equipment and supply systems for intensive care. Ondal Industrietechnik is one of the leading producers in Europe of controls for saunas, infrared cabins and colored lighting systems. An additional business area is hairdresser technology, in which haircutting machines, hood-style hairdryers, infrared heat and steam equipment is manufactured. In addition, Ondal is the leading manufacturer for automated machinery for processing of adhesive tape which is used in the automotive and automotive supplier industry. In 2006, the company of 450 employees achieved revenues of around EUR 73 million.

The SAP HR areas of personnel billing, time management, organization management, the Entgelt-Rahmenabkommen (ERA – Framework for reforming collective wage agreements), Betriebliche Altersvorsorge (BAV – Corporate pension plans), travel expenses and personnel cost planning are included in the implementation. The entire HR division of more than 200 SAP users is hosted by itelligence.

Helmut Weppler, Head of Personnel and HR Project Manager at Ondal Industrietechnik explained his choice: "As an international midmarket company, we have made the right choice with itelligence and have found a full-service SAP service provider with competent knowledge of the industry that can provide us with a complete package of SAP HR services and can fully assume the routine activities in human resources. Now, we are concentrating on personnel development, applicant management and the optimization of HR processes."

**Press Release - itelligence**

**SAP consulting house itelligence wins new customers in the industrial and medical sectors**

**Ondal Industrietechnik expands its own competence in human resources together with itelligence and SAP HR**

On July 1, 2007, the Wella Group sold Ondal Industrietechnik to the affiliated company, Findos Investor. With this spin-off from the large corporation, the newly formed midmarket company is establishing its own SAP HR competency in human resources for its new flexible structures – with the support of itelligence. The full-service IT service provider from Bielefeld has taken over routine activities such as maintenance of the SAP HR system, basic activities, SAP hosting and HR output management, printing and posting pay statements.

The background: Not only is SAP the world leader in the area of ERP solutions, but also in software solutions for personnel management. As an SAP Special Expertise Partner for Human Capital Management, the SAP consulting house itelligence won Ondal Industrietechnik over with its competent industrial knowledge and a complete package of services from one source. itelligence is one of a very small number of SAP partners worldwide that offers the midmarket the complete process chain in its portfolio, from consultation about implementation to extensive hosting services.

Meinolf Schäfer, Manager of SAP Midmarket Sales for itelligence AG, explained the significance of the project: "In addition to the guaranteed future of the SAP software, the security of implementation in the area of SAP HR is especially requested of itelligence. Along with a comprehensive transfer of knowledge, itelligence's long-standing expertise regarding the dissolution of SAP systems in the corporate spin-off of individual business units was an important decision criterion for Ondal Industrietechnik."

**About itelligence**
