

Comprehensive IT industry solution from itelligence reduces interfaces and costs at Siemens subsidiary mdexx

SAP consultancy itelligence implements it.manufacturing at mdexx Magnetronic Devices

Bielefeld (Germany), April 1, 2008 – mdexx Magnetronic Devices of Bremen, a wholly-owned subsidiary of Siemens AG, is implementing the itelligence industry solution “it.manufacturing” for the manufacturing sector. With it, they are replacing the previously used heterogeneous production and material planning system from another provider with an integrated SAP solution. Their partner for consulting and implementation is itelligence AG of Bielefeld.

Drawing on more than 100 years of experience, mdexx Magnetronic Devices develops and produces SIDAC transformers, power supplies, reactors and filters as standard catalog products and as customer-specific variants, as well as SIVENT axial and radial fans for custom-made ventilation solutions. mdexx has roughly 450 employees at its Bremen site.

The goal of the project is a quick, comprehensive migration of the system to SAP as their enterprise software to attain greater data transparency and improved competitiveness for the growing Bremen manufacturing company. mdexx chose itelligence, one of the leading international IT full-service providers for SAP, on account of its industry expertise in the manufacturing and high-tech sectors. In addition, mdexx relies on the midmarket experience of the SAP consultancy, headquartered in Bielefeld. Both are to be used to progress with the complex migration as quickly as possible.

One of the decisive advantages of migrating to it.manufacturing will be the reduction of interfaces. Roughly 300 users will be working with the system in the area of production planning and materials management at the start of the productive phase. The previous legacy system was linked with the existing SAP system via different, in part logically disparate, interfaces. Implementation of it.manufacturing will eliminate these interfaces and duplication of data acquisition. Furthermore, the uncomplicated linkage to new systems – external ones as well – will be simplified. mdexx will use SAP system’s NetWeaver technology for this, which is offered with it.manufacturing.

Press Release - itelligence

**Comprehensive IT industry solution from itelligence reduces interfaces and costs at a Siemens subsidiary
SAP consultancy itelligence implements it.manufacturing at mdexx Magnetronic Devices**

Hartmut Meyer-van Laaten, head of IT at mdexx Magnetronic Devices explains, “With it.manufacturing from itelligence, we will be better able to model both of our product areas – transformer and fan manufacturing – across all process levels, in an integrated enterprise software. This is a great advantage here, because itelligence is providing us with manufacturing and high-tech expertise from a single source.”

About itelligence

itelligence is one of the leading international full-service provider for SAP employing more than 1,220 highly qualified employees in 16 countries and in 5 regions (America, Asia, Western Europe, Eastern Europe and Germany/Austria). As a mySAP Business, Service and Support Alliance as well as Global Partner Hosting and Global Services Partner, itelligence realizes complex projects in the SAP environment for over 2,500 customers worldwide. In 2006, itelligence obtained the status as Gold Partner SAP in Germany, U.S. followed in 2007. The company’s services range from SAP consulting and licensing to outsourcing and services to proprietary industry-specific SAP solutions. In 2007, itelligence generated total sales of EUR 190,9 million.
