

**itelligence gains additional middle-market customer in the core manufacturing segment**

### **itelligence becomes SAP consultation company for SCA Schucker GmbH & Co**

Bielefeld, September 28, 2005 – itelligence AG is introducing its industry solution it.engine at SCA Schucker GmbH & Co. – the world market leader and manufacturer of adhesive systems and dosing technology for the automotive industry. In 2004, SCA Schucker GmbH, which has more than 250 employees, generated sales in 12 countries of around EUR 70 million.

The first project stage begins in August 2005 with the replacement of the existing systems, including data migration. The main focus of this stage will be the introduction of SAP for service handling and management. CAD integration with document management and integration of the existing time recording system in SAP HR are also planned. In addition, the scheduled stock connection via barcode scanning (radio frequency) and the use of variant configuration also promise further increases in efficiency – for customer service that is more efficient still.

Customer service with the highest quality takes center stage at SCA Schucker. Established in 1986 with four employees, SCA Schucker has grown into a global company for adhesive systems and dosing technology. SCA Schucker branches and service centers ensure direct contact with all key automotive manufacturers. The automotive industry finds it important to work together with a systems partner that not only supplies the right equipment components, but that can also provide details of optimized production processes in the run-up to decisions with multidisciplinary expertise. The industry-related functions of it.engine facilitate interaction in the working supply chain.

Michael Sachs, Commercial Manager of SCA Schucker GmbH & Co. has voiced his expectations, saying that "the polished processes knowledge of an itelligence consultant is of the utmost benefit in our industry. And with the application of it.engine, we have a scalable industry solution that is more secure in terms of investment with state-of-the-art SAP technology which improves our ability to compete in global competition."
