

Clever alliance: SAP consultancy itelligence and Avira form a partnership Security for SAP NetWeaver with Avira AntiVir

Tettnang, Bielefeld, June 1, 2006 – itelligence is taking the Avira AntiVir solution for the SAP NetWeaver platform into its portfolio. With this step, the internationally active full-service IT provider for SAP complements its offerings with the virus protection solution Avira AntiVir Virus Scan Adapter (for SAP Solutions).

Avira's security solution is the first virus scanner to be certified by SAP that utilizes this SAP VSI interface. The software monitors the complete document exchange from SAP applications and supports ABAP and JAVA-based systems as well as connected applications. With this partnership, itelligence offers SAP customers a complete package that includes the virus protection product, knowledgeable consulting and implementation for the special applications of the Walldorf-based software designers.

“Avira is the right choice of an SAP Certified Software Partner for us”, said a pleased Markus Kellermeyer, head of Technology Consulting at itelligence. “Through use of the Avira AntiVir Virus Scan Adapter online job applications, for example, that are directly downloaded over the HR module into the SAP system can be immediately checked for viruses. In this way, a possible further infection through the downloading or opening of virus-infected data is effectively avoided.”

About itelligence

itelligence is one of the leading international full-service provider for SAP employing some 1000 highly qualified employees in 15 countries and in 4 regions (America, Western Europe, Eastern Europe and Germany/Austria). As a mySAP Business, Service and Support Alliance as well as Global Partner Hosting and Global Services Partner, itelligence realizes complex projects in the SAP environment for over 1,200 customers worldwide. Security for SAP NetWeaver with Avira AntiVir

About Avira

Avira (formerly H+BEDV) is among the pioneers of IT security. Already in 1988 the German security specialist developed system-spanning security solutions for the business and private customer area under the brand name AntiVir. Leading national and international companies, various educational institutions as well as public contractors are among their customers.

With a broad portfolio, Avira offers professional security solutions for workstations, file, web and mail servers as well as for PDAs and smartphones. Along with a high performance offering for the Windows environment, Avira is one of the technological leaders in the UNIX market. Furthermore, in 2005 the company brought worldwide the first SAP certified virus protection solution for SAP NetWeaver to the market.

The Avira AntiVir virus protection solution is regularly honored with the VB 100% Award and is in possession of a current Technical Inspection Agency (TÜV) certificate. The company's high level of expertise in the area of IT security has also been documented through close cooperation with the Bundesamt für Sicherheit in der Informationstechnik (German Federal Office for Information Security; BSI).

Avira security solutions are available from numerous Avira dealers in Europe and abroad.
