

**Migration to the SAP R/3 Enterprise Release realized in only two months**

### **itelligence implements new SAP R/3 Enterprise Release at JUWEL Aquarium**

Frankfurt, July 29, 2003 – It took JUWEL Aquarium only two months to migrate the new SAP R/3 Enterprise Release 4.70. Based in Rotenburg/Wümme, JUWEL Aquarium GmbH & Co. KG is Europe's biggest manufacturer of high-quality aquariums, cabinets and accessories employing some 80 people and supplying wholesalers in over 30 countries. JUWEL commissioned itelligence, a full-service provider for SAP, to realize the release change from SAP R/3 4.5 to SAP R/3 4.70.

itelligence AG has advised JUWEL since it first introduced SAP R/3 in 1998. Since then, the manufacturer of aquariums had used SAP R/3 4.5B as well as the accounting (FI), controlling (CO), customer order processing (SD), production planning and control (PP) and materials management (MM) modules. The technical release change of the existing infrastructure began in April 2003.

The migration to the SAP R/3 Enterprise Release 4.70 was motivated by the extended functionality of the new version as well as the faster and more flexible installation of additional functions. This included the optimized connection of the raw material warehouse to the SAP system. As of August 2003, JUWEL's employees will enter incoming and outgoing materials directly by scanning their barcodes. The scanners will use a radio link to transmit the data of inventory movements to the SAP R/3 Enterprise system working in the background. The on-site recording of data and the direct transmission of data will help avoid mistakes resulting from the manual entry of data. JUWEL also expects to save time and money through electronic matching of data during the annual inventory.

"We were once more impressed by itelligence's excellent SAP know-how and the speedy and reliable implementation of the system. High commitment and a concept geared to the needs of our users permitted a smooth introduction. itelligence's consultants realized the release change in a very short period of time. Everything is up and running and we are very satisfied with the result," Wolfgang Dürmeyer, Managing Director of JUWEL GmbH & Co. KG, summarized his experience with the project.

The SAP R/3 Enterprise Release 4.70 allows users to install extensions providing additional sets of functions without a complete release change. All SAP R/3 Enterprise Extensions are included in the SAP R/3 Enterprise Extension Set and supplied in the form of an add-on for the SAP R/3 Enterprise Core. The extensions can be installed individually as and when additional functions are needed. In future, additional functions will be provided through the further development of existing extensions or the delivery of new ones. JUWEL plans to activate the first extension in autumn 2003.

**About itelligence AG:**

**itelligence AG is a leading international full-service provider for SAP employing some 1,300 highly qualified employees at 42 branches in 19 countries.
